Emily Resort

Ukrainian Resort Revitalizes Toward Their Vision of a Brighter Future

📍 Lviv, Ukraine

Referred to as the soul of Ukraine, the beautiful city of Lviv lays nestled just northeast of the Carpathian Mountains. Ornate domed spires rise from a sea of cafés, shops and bath houses, but this once tranquil city is now home to waves of refugees fleeing war-torn regions of Ukraine. Amidst the uncertainty of the present, Emily Resort, a family-friendly multi-functional resort complex encompassing sports, entertainment, and wellness, is pointing its efforts toward the future, bettering itself in anticipation of brighter days and of a people anxious to experience joy.

Challenges

Special points of interest in Emily Resort are the expansive beach and poolside areas, encompassing the island chalet, poolside food and beverage facilities, and even a children's water park. It was in these outdoor spaces the Emily Resort team focused their attention, looking to incorporate a top-notch AV system to further elevate patron experiences. To achieve this, they partnered with Red Wire as their integration partner. Illya Orlov, AV Integrator for Red Wire, explains, "The poolside and water recreation facilities are subject to an incredibly high standard and when the previous solution was incapable of delivering, we were brought in to find a new solution." Q-SYS became that solution, rising above the rest. "Our architects and designers had relayed their high expectations for audio quality, and after a single test session with Q-SYS loudspeakers they were convinced that this was the way forward."

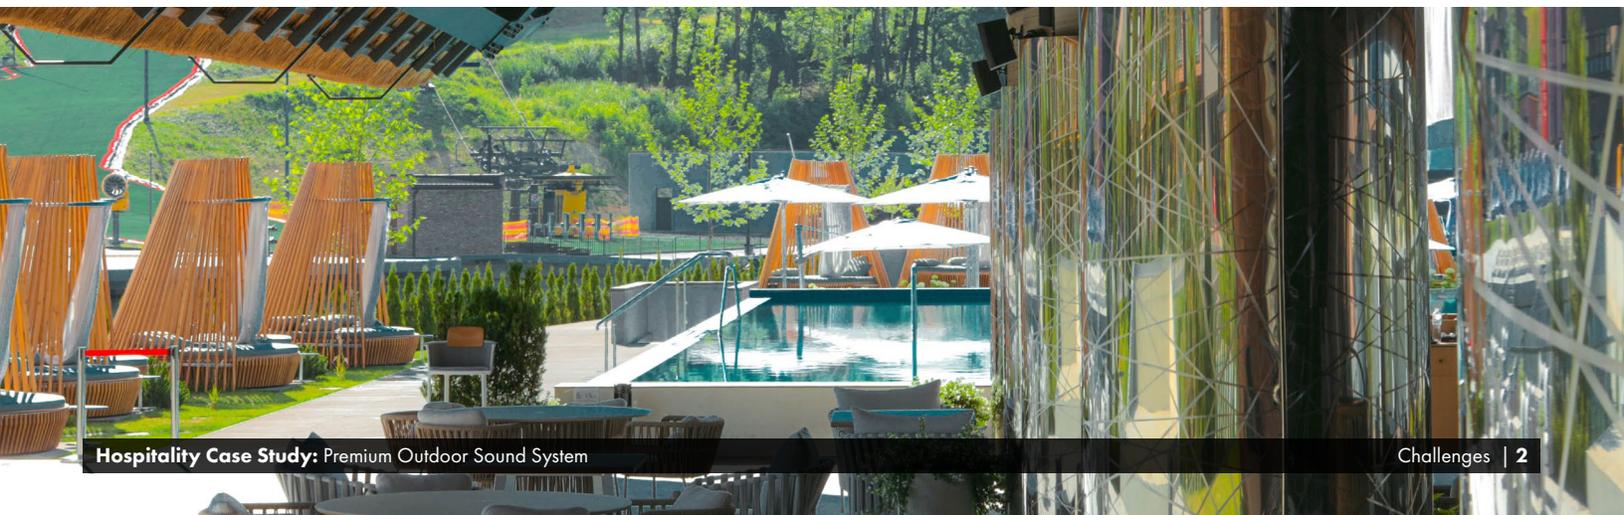

Tackling Supply Chain Woes

With Q-SYS enthusiastically approved as the solution, the Emily Resort team faced further complications. While the world at large faced supply chain issues, the active war in Ukraine compounded the issue. Working with Q-SYS distributor [Real Music](#), the equipment arrived on time but needed some special augmentations. "Due to the global production and logistics crisis and the war in our country, it was quite difficult for us to access the right equipment, and required some outside of the box thinking because we needed significant weather resistance. We decided to adapt our [Q-SYS AcousticCoverage Series loudspeakers](#) by adding protection to the connectors for outdoor use," describes Illya. "In the end, we were able to equip a loudspeaker system that not only satisfied our customers from a sound quality perspective, but also from an aesthetic perspective."

Solutions

Successfully Up and Running

Racing against the clock, and going so far as to temporarily live at Emily Resort to meet their deadlines, Illya and the Red Wire team successfully brought the installation live in late summer. Since then, the new system has met with positive reviews not only from patrons but end users, as the administrative staff are the daily operators. Illya gives a partial breakdown of what was put in place, “Given the large number of zones, the [Q-SYS MP-M Series](#) music and paging mixers with additional [Q-SYS MP-MFC](#) wall controllers and [Q-SYS MP-A Series](#) multi-channel amplifiers proved to be the ideal combination for sound management. And for areas with a large number of loudspeakers, we chose the powerful [Q-SYS ISA Series](#) commercial amplifiers, as they’re extremely reliable.”

A Hopeful Future

Even amidst the present-day turmoil, Emily Resort has plans to expand to serve more visitors. This resilience and optimism is one small example of a larger theme displayed within Ukraine during these difficult days. Q-SYS is grateful to have been their chosen solution, and is looking forward to patrons experiencing all that Emily Resort has to offer. Illya concludes, “Q-SYS shipped fast and worked with us along with Real Music to keep us up to date on availability and timelines. They’ve proved to be a reliable and valued partner at a complicated time.”
